

## **PRESS RELEASE FOR IMMEDIATE RELEASE**

### **EZ Dupe announces the release of its new FlashMAX USB, CF and SD Flash Duplicator series**

**January 18, 2013 (City of Industry, CA)** – Due to the highly successful FlashMax USB duplicator, EZ Dupe is now expanding the FlashMAX product line to include two new products – the FlashMAX SD duplicator and the FlashMAX CF duplicator. FlashMAX USB, SD and CF duplicators easily and reliably create multiple copies of your USB, SD (MiniSD/MicroSD with adapter), and CF flash media without a computer or software. Each channel has dedicated copy throughput of 2GB per min.

#### **Features:**

- Asynchronous copy mode allows each channel to function independently and copies directly from built-in memory so there is no need to interrupt a copy cycle as each channel will load, unload and copy independently.
- Source Analysis feature identifies the content on the master and intelligently copies only the data to speed up the copy cycle.
- Test function checks the USB and CF/SD flash media quality and read/write speed.
- Fast, reliable, convenient and cost-effective to operate, FlashMAX duplicators offer an easy and efficient platform to make multiple copies of your data.

“FlashMax duplicators are the first duplicators on the market that implement asynchronous copy without data and memory size limitation. With our exclusive and unique SOTA Version 2 Technology, real time copy and compare function can achieve a higher efficiency level,” says Anthony Zhang, Sales Director of EZ Dupe. “Thanks to its revolutionary compact ergonomic design, our customers can now easily insert and remove flash media, and get more done in less time.”

Potential markets for the FlashMax duplicators include: marketing, audio/video production, photography, government, education, embedded systems and more. FlashMax duplicators are available 15, 31 and 39 targets for USB and SD models, and 7 and 15 targets for the CF model. For more information, please visit our website at [www.ezdupe.com](http://www.ezdupe.com).

#### **About EZ Dupe**

EZ Dupe has been a pioneer in developing and manufacturing EZ Dupe CD/DVD/USB/Flash Memory duplication systems and portable duplication technologies since 1995.

EZ Dupe provides a three-year limited warranty (one-year warranty for certain products and market) on all duplication systems and proudly assembles and tests all products in City of Industry, California.
