

PRESS RELEASE FOR IMMEDIATE RELEASE

EZ Dupe announces the release of ISO Duplicator Series

City of Industry, CA, July 25, 2014 – EZ Dupe, introduces a new DVD/CD Duplicator Series- ISO Duplicator. This new series features a "Drag & Drop" function which enables direct loading of ISO image files from a computer onto the duplicator's hard drive without using any special software. After the ISO image files are transferred to the duplicator's hard drive, they can be used as source files for duplication. Any file or data on the computer has to be converted into an ISO image file first. Then it can be loaded directly into the duplicator's hard drive.

"The duplicator's hard drive is linked to a computer via a USB 3.0 connection. This new "Drag and Drop" feature will help save time and effort by loading files directly from a computer on to the duplicator's built-in hard drive" says Anthony Zhang, Sales Director of EZ Dupe. "Thanks to this innovative update, our customers can duplicate DVD/CD's without having to create a master disc."
