EZ Dupe introduces USB Duplicators that support USB Hard Disc Drives No Cabling – No Lost Port

April 2015 (City of Industry, CA) EZ Dupe has upped the ante on USB duplication with the release of their 2015 USB duplication systems. The entire line-up of USB duplicators now includes built-in capability of supporting not only USB HDD, but all USB devices - Each USB port delivering up to 2.6 Amps for all classes of USB devices. Neither special cabling, nor extra USB port is needed.

“These professional duplicators have exclusive and proprietary comparison algorithm sub-sets to assure maximum performance and possess the highest content accuracy ever built into a USB duplicator”, states Anthony Zhang, EZ Dupe sales director.

Additionally with up to 2GB per minute, per port, EZ Dupe’s USB line-up provides maximum copying speed for each copied device and fully supports all file systems, file size and drive capacity. Every USB port also includes Asynchronous copy capability allowing for each port to operate individually.

EZ Dupe sales director, Anthony Zhang goes on to say “We are restating USB duplication, EZ Dupe is the standard bearer of the USB duplication category.”
